Career Objective:

Android enthusiast with hands-on experience in Kotlin, Java, and Jetpack Compose. Eager to build impactful mobile apps, enhance technical skills, and contribute to innovative projects.

Projects:

Crypto App Tracker:
Technologies: Kotlin, Jetpack Compose, Material 3 Theming, Ktor, MVVM, Koin, Paging 3, Canvas, Coroutines, LiveData

- Live cryptocurrency price & market data fetching using public API
- Custom graph rendering with Canvas for market trends
- Smooth, paginated data display via Paging 3 and MVVM architecture

Personal News App:
Technologies: Kotlin, Jetpack Compose, MVVM, Paging 3, Retrofit, Room Database, Dagger Hilt, DataStore Preferences, Coroutines

- Real-time news fetching with category-based filtering and search
- Offline article saving via Room, app preferences via DataStore
- Clean architecture with Paging 3 and Dagger Hilt for dependency management

Lead and Follow Management App:
Technologies: Kotlin, Jetpack Compose, Firebase, MVVM, Room Database, DataStore Preferences, Flow, Notification Manager, WorkManager, Dagger Hilt.

- Lead management with CRUD, reminders, push notifications, and cloud sync
- Background tasks using WorkManager and real-time updates with Flow
- MVVM pattern integrated with Dagger Hilt and DataStore for preferences

Internships

Android Developer Intern   February 2025 - June 2025
TechPuram, Madurai (Remote)

- Developed a full-fledged CRM Android application using Jetpack Compose, Room Database, Dagger Hilt, and WhatsApp API.
- Designed and implemented lead management, customer interaction, and follow-up scheduling features.
- Followed MVVM architecture and applied DataStore for persistent app preferences.

Academic Qualifications:

- **B.E. Computer Science and Engineering**   *Pursuing* | **CGPA**: 8.2
  Nehru Institute of Engineering and Technology, Coimbatore
- **HSC (Class 12)**   *Year of Completion:* **2022** | **Percentage**: 85.8%
  BMC Matriculation Higher Secondary School, Thoothukudi

Technical Skills:

- Proficient in using Kotlin, Java, Solidity
- Experience with Android Studio, Jetpack Compose, Room Database, Retrofit, Koin, DagerHilt, Ktor, Material 3, MVVM, Paging 3, Coroutines, Flow, LiveData, WorkManager, AndroidX NavGraph
- Familiarity with GitHub, Git, MySQL, SqLite

Certificates and Achievements:

- **Winner** in "Bio-Med Bharat 2024 Hackathon".
- **Finalist** in "Smart India Hackathon 2024".
- Completed 30+ Badges on **Google for developers** under Jetpack Compose.
- Completed "Android App Development in 34 Hours : MobDevOps+ Android 15" by OCSALY Academy.
